Center for Embryo Medicine will hold the II International Workshop on embryo biopsy and cell fixation: a hands-on course.

Participants will learn all technical and practical aspects of this technique in order to apply them in their Centers.

- Embryo biopsy

(laser system and Tyrode's acid)

- Blastomere fixation

(inverted microscope and stereo microscope)

During the two days participants will undertake intensive training in embryo biopsy and cell fixation in work teams of two people. All work will be supervised by an expert who will follow the training process through a camera.

The hands-on course will be held in Madrid at the Center for Embryo Medicine.

Price : 1350 €

For any question please do not hesitate to contact us at pgd@pgdcem.com.
